Objective

Motivated Computer Science student seeking for an internship opportunity to gain hands on experience in web/App development and real word problems.

EDUCATION

Shaheed Zulfikar Ali Bhutto Institute of Science and Technology Karachi, Pakistan

Major: Bachelor of Science in Computer Science (2023-2027)

RELEVANT COURSES

- | | | |
|-------------------------------|---------------------------------------|-------------------------------------|
| • Operating systems | • Hybrid Mobile Application | • Artificial Intelligence |
| • Data Structure & Algorithms | • Database Design | • Web Technologies |
| • Object Oriented Programming | • Software construction & development | • Design and Analysis of Algorithms |

SKILLS

Programing Language: Java , Python , C# .Net , TypeScript , JavaScript

Web: Html , CSS , React.js , Figma (UI/UX)

Databases: MySQL , PostgreSQL , SQL Server , MongoDB

Core Concepts: Object-Oriented Programming (OOP) in Java , Data Structures & Algorithms (DSA)

EXPERIENCE

Tech Core Director — Zabefest, Szabist University (2025 – 2026)

- Managing technical operations and coordinating tech teams for Zabefest events.
- Overseeing event systems, technical setup, and digital coordination.

Marketing Director — ACM Society, Szabist University(2025 –2026):

- Leading marketing strategies and promotional campaigns for ACM events and activities
- Managing a team to increase student engagement and event participation.

Brand Ambassador — Developers Day, FAST University (2026):

- Represented Developers Day and promoted the event within the student community.
- Assisted in outreach and engagement with students and tech enthusiasts.

HackFest, IBA Karachi University:

- Engaged in intensive techpreneurship sessions to develop innovative solutions under time constraints, demonstrating adaptability and technical expertise.

PROJECTS

Online Voting System Portal — [Visit](#)

- A secure web-based Online Voting System built with ASP.NET Core MVC and Entity Framework Core. Features admin panel, voter registration, election management, real-time voting, and results dashboard..
- **Technologies:** C#.Net , HTML , CSS , JavaScript , SQL Server

Airline Management Portal — [Visit](#)

- A PostgreSQL-based Airline Reservation System with tables for flights, passengers, bookings, staff, payments, and more. Includes ERD and data for academic or learning use..
- **Technologies:** Javascript , nodejs , Postgresql , Html , Css

Salary Prediction using PyTorch Neural Network — [Visit](#)

- Built a deep learning regression model using PyTorch to predict employee salaries based on position levels. Applied data preprocessing, feature scaling, train-test splitting, and neural network optimization techniques to improve prediction accuracy.
- **Technologies:** Python , Pytorch , Pandas , DeepLearning , Matplotlib

Portfolio Website — [Visit](#)

- Built and deployed a personal portfolio website to showcase projects, technical skills, certifications, and achievements in a clean and responsive interface. Designed the portfolio with modern web technologies to improve user experience, accessibility, and professional online presence..
- **Technologies:** JavaScript , Html , Css

Atm System — [Visit](#)

- ATM & Bank Management System A GUI-based desktop application built using Java, Swing, and MySQL that simulates basic banking operations like account creation, authentication, withdrawal, deposit, and balance inquiry..
- **Technologies:** Java , Swing , Mysql
